

Instructions

TP10

You are now participating in an economic experiment funded by various research support foundations.

Please read the following instructions carefully. The instructions will provide you with all the information you require for participation in the experiment. Please ask for assistance if there is something that you do not understand. Your question will be answered at your workplace. There is a strict prohibition of communication during the experiment.

You will receive an initial endowment of 5 dollars at the beginning of the experiment. You can earn additional money over the course of the experiment by collecting points. All of the points that you accrue over the course of the experiment will be converted to dollars at the end of the experiment. Please note that:

1 point = 20 cents

At the end of the experiment, you will receive the income you earned over the course of the experiment plus the 5 dollars of initial endowment in cash.

The experiment

In this experiment, any participant can be randomly assigned to the role of participant A, participant B, or participant C. Each participant A is associated with a participant B in a group of two. Participant C is matched with a group composed of a participant A and a participant B. No participant knows with whom they are associated so all decisions are made anonymously.

Participant A's decision:

- Participant A receives 120 points at the beginning of the experiment.
- Participant B receives no points.
- Participant A can decide how many points to transfer to participant B.
- The experimenter doubles each point A transfers to B.
- So each point which A transfers to B reduces A's income by one point and increases B's income by two points.
- The formula for calculating income is as follows:

Participant A's income: $120 - \text{transfer}$

Participant B's income: $0 + 2 * \text{transfer}$

The following examples will clarify the income formulas:

- Example 1: A transfers 0 points to B. The incomes are then 120 for A and 0 for B.
- Example 2: A transfers 20 points to B. The incomes are then 100 for A and 40 for B.
- Example 3: A transfers 80 points to B. The incomes are then 40 for A and 160 for B.

The experiment consists of two stages:

Stage 1:

- In stage 1, C decides if they will constrain A to transfer at least 10 points to B, or if they will allow A to decide freely.

Stage 2:

- In stage 2, A decides how many points they will transfer to B. The number lies between 10 and 120 if C constrains A to transfer at least 10 points, or between 0 and 120 if C does not constrain A to transfer at least 10 points.
- Participant A must decide how many points they will transfer to B before they know whether or not C will constrain A to transfer at least 10 points.

Participant B's decision:

- Participant B plays a passive role during the experiment.
- This means that participant B will not make any direct decision during the experiment.

Participant C's decision:

- Participant C acts as a third party in the relationship between A and B.
- Before participant A decides how many points they wish to transfer to B, participant C can determine a minimum transfer.
- C can constrain participant A to transfer B at least 10 points.
- C can also decide not to limit participant A and thus leave A's transfer decision completely free.
- The income of participant C is completely independent of both their own decision and participant A's decision regarding how many points transfer to B.
- Participant C will only be paid the initial endowment of 5 dollars.

There are two cases:

Case 1: Participant C constrains participant A to transfer at least 10 points to participant B. In this case, participant A can transfer any number of points **between 10 and 120** to B.

Case 2: Participant C allows participant A to decide on their transfer freely and does not constrain A to transfer at least 10 points to participant B. In this case, participant A can transfer any number of points **between 0 and 120** to B.

- C makes their decision with the help of the following screen:

You are participant C.

Participant A has 120 points.
You can constrain participant A to transfer at least 10 points.
The experimenter will double each point that participant A transfers to participant B.

Do you want to impose a minimum transfer of 10 points?

☐ Yes
☐ No

OK

- Participant A must decide how many points they will transfer to B before knowing whether or not C will constrain A to transfer at least 10 points to B.
- This means that participant A must make two decisions (Case 1 and Case 2).
- Participant A makes their entries with the help of this screen:

You are participant A.

You have 120 points; participant B has 0 points.
You can transfer points to participant B.
The experimenter will double each point you transfer.

Case 1: Assume that participant C has constrained you to transfer at least 10 points.
How many points will you transfer in this case?

Case 2: Assume that participant C allows you to decide freely.
How many points will you transfer in this case?

OK

- Therefore, participant A indicates how many points they transfer to B when C constrains A to transfer at least 10 points (Case 1) and how many points they transfer to B when A is free to decide (Case 2).
- Which of the decisions is relevant for participant A depends on what C decides.
- If C constrains A to transfer at least 10 points, the decision A indicates under case 1 applies.
- If C leaves A to choose freely, the number of points A indicates under case 2 applies.

After decisions have been made:

- The experiment is completed as soon as A has decided how many points they transfer to B.
- After the decisions have been made, the participants answer a questionnaire.
- A final income screen will inform you of the decisions and the resulting incomes.
- Your point income will be converted to dollars and paid out in cash to you together with your initial endowment.

Do you have any questions?

The General Causality Orientations Scale (GCOS)

The Scale (12-vignette version)

These items pertain to a series of hypothetical sketches. Each sketch describes an incident and lists three ways of responding to it. Please read each sketch, imagine yourself in that situation, and then consider each of the possible responses. Think of each response option in terms of how likely it is that you would respond that way. (We all respond in a variety of ways to situations, and probably most or all responses are at least slightly likely for you.) If it is very unlikely that you would respond the way described in a given response, you should circle answer 1 or 2. If it is moderately likely, you would select a number in the mid range, and if it is very likely that you would respond as described, you would circle answer 6 or 7.

1. You have been offered a new position in a company where you have worked for some time. The first question that is likely to come to mind is:

- | | | | | | | | |
|----|--|---|---|-------------------|---|-------------|---|
| a) | What if I can't live up to the new responsibility? | | | | | | |
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| | very unlikely | | | moderately likely | | very likely | |
| b) | Will I make more at this position? | | | | | | |
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| | very unlikely | | | moderately likely | | very likely | |
| c) | I wonder if the new work will be interesting. | | | | | | |
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| | very unlikely | | | moderately likely | | very likely | |

2. You have a school-age daughter. On parents' night the teacher tells you that your daughter is doing poorly and doesn't seem involved in the work. You are likely to:

- | | | | | | | | |
|----|--|---|-------------------|---|---|-------------|---|
| a) | Talk it over with your daughter to understand further what the problem is. | | | | | | |
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| | very unlikely | | moderately likely | | | very likely | |
| b) | Scold her and hope she does better. | | | | | | |
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| | very unlikely | | moderately likely | | | very likely | |
| c) | Make sure she does the assignments, because she should be working harder. | | | | | | |
| | 1 | 2 | 3 | 4 | 5 | 6 | 7 |

very unlikely

moderately likely

very likely

3. You had a job interview several weeks ago. In the mail you received a form letter which states that the position has been filled. It is likely that you might think:

- a) It's not what you know, but who you know.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

- b) I'm probably not good enough for the job.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

- c) Somehow they didn't see my qualifications as matching their needs.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

4. You are a plant supervisor and have been charged with the task of allotting coffee breaks to three workers who cannot all break at once. You would likely handle this by:

- a) Telling the three workers the situation and having them work with you on the schedule.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

- b) Simply assigning times that each can break to avoid any problems.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

- c) Find out from someone in authority what to do or do what was done in the past.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

5. A close (same-sex) friend of yours has been moody lately, and a couple of times has become very angry with you over "nothing." You might:

- a) Share your observations with him/her and try to find out what is going on for him/her.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

- b) Ignore it because there's not much you can do about it anyway.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

- c) Tell him/her that you're willing to spend time together if and only if he/she makes more effort to control him/herself.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

6. You have just received the results of a test you took, and you discovered that you did very poorly. Your initial reaction is likely to be:

- a) "I can't do anything right," and feel sad.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

- b) "I wonder how it is I did so poorly," and feel disappointed.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

- c) "That stupid test doesn't show anything," and feel angry.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

7. You have been invited to a large party where you know very few people. As you look forward to the evening, you would likely expect that:

- a) You'll try to fit in with whatever is happening in order to have a good time and not look bad.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

- b) You'll find some people with whom you can relate.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

- c) You'll probably feel somewhat isolated and unnoticed.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

8. You are asked to plan a picnic for yourself and your fellow employees. Your style for approaching this project could most likely be characterized as:

- a) Take charge: that is, you would make most of the major decisions yourself.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

- b) Follow precedent: you're not really up to the task so you'd do it the way it's been done before.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

- c) Seek participation: get inputs from others who want to make them before you make the final plans.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

9. Recently a position opened up at your place of work that could have meant a promotion for you. However, a person you work with was offered the job rather than you. In evaluating the situation, you're likely to think:

- a) You didn't really expect the job; you frequently get passed over.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

- b) The other person probably "did the right things" politically to get the job.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

- c) You would probably take a look at factors in your own performance that led you to be passed over.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

10. You are embarking on a new career. The most important consideration is likely to be:

- a) Whether you can do the work without getting in over your head.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

- b) How interested you are in that kind of work.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

- c) Whether there are good possibilities for advancement.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

11. A woman who works for you has generally done an adequate job. However, for the past two weeks her work has not been up to par and she appears to be less actively interested in her work. Your reaction is likely to be:

- a) Tell her that her work is below what is expected and that she should start working harder.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

- b) Ask her about the problem and let her know you are available to help work it out.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

- c) It's hard to know what to do to get her straightened out.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

12. Your company has promoted you to a position in a city far from your present location. As you think about the move you would probably:

- a) Feel interested in the new challenge and a little nervous at the same time.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

b) Feel excited about the higher status and salary that is involved.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely

c) Feel stressed and anxious about the upcoming changes.

1	2	3	4	5	6	7
very unlikely			moderately likely			very likely
